## TESTIMONIALS

"The message you delivered to the students was amazing. They loved it! They received it so well. This will be a symposium we are all going to remember for many more years to come."

- **Kristen Orlando, Hope's Door**

"Honestly if I could bottle you up and have all providers hear your testimony, I would. Everything you shared is exactly what we (Kaiser Permanente) are trying to do in linking domestic violence to chronic medical conditions in ways that we can better serve our patients."

- **Medical Doctor, Kaiser Permanente**

"When I got in touch with Kristen, the angels really did sing. We were able to have deep dialogue where students could truly be open and have a safe space to talk about such a hard topic that affects a lot of college students. Kristen got down and passionate with our students. We highly recommend her for your campus!"

- **Jeina, Ottawa University**
